| TITLE | Annual Statistical Report, Program Operations 1986. New York State Division for Youth. |
| INSTITUTION | New York State Div. for Youth, Albany. |
| PUB DATE | Oct 86 |
| NOTE | 143p.; For the 1985 report, see UD 025 792. |
| PUB TYPE | Statistical Data (110) |
| EDRS PRICE | MF01/PC06 Plus Postage. |
| DESCRIPTORS | Adolescents; Crime; *Delinquency; *Delinquent Rehabilitation; Demography; Differences; Ethnicity; *Participant Characteristics; Regional Characteristics; *Residential Institutions; Residential Programs; *Youth |
| IDENTIFIERS | *New York |

ABSTRACT

This statistical report provides a summary of the characteristics of the 2424 young people committed to residential programs of the New York State Division for Youth during 1985. It provides information on the patterns in individual and regional placement. The data are presented in such a way that comparisons can be made across years. A summary of findings and 49 tables of statistics include information on the following variables: (1) racial and ethnic group membership; (2) classification of offenses; (3) readmission rates; (4) length of stay; (5) age differences; (6) sex differences; and (7) level of placement. Among the findings are the following: (1) the number of admissions increased; (2) the age distribution remained the same as in previous years; and (3) Black youths were admitted and readmitted in larger numbers than Whites or Hispanics. (VM)

EXECUTIVE DEPUTY DIRECTOR

To the Governor and People of New York State:

I am pleased to present the Division for Youth's eighth Program Operations Annual Statistical Report. The report provides a summary of the characteristics of the 2,000+ young people committed to the Division's residential programs during 1985, and provides a picture of the patterns in individual and regional placements experienced by the Division during the past year. Because the report retains the same basic format we have found to be successful in preceding years, when used in conjunction with previous years' reports, comparison of information across years and the identification of trends in DFY clientele characteristics may be readily obtained.

The report should prove to be a valuable resource for those officials in state and local government who are involved in the welfare of the young citizens of our State, and should also function as an information source for private agencies concerned with the juvenile justice system. For the Division, the report represents another chapter in its history, providing us with archival data upon which to base the Division's planning efforts for 1987 and future years. Although each year's experience is valuable in its own right, this report also provides a basis for understanding the role played by the Division in the State's long term commitment to its youth.

Any questions or comments which you may have concerning this report should be directed to the Bureau of Program Analysis and Information Services (518-473-4486).

Respectfully submitted,

Leonard G. Dunston

43. Adjudication of DFY Admissions by County of Referral, 1985... 58

44. Level of Placement of DFY Admissions by County of Referral, 1985..... 60

45. Charge Type of DFY Admissions by County of Referral, 1985.... 62

VII. Service Terminations:

46. Length of Stay by Admission Type, Age, Sex, and Ethnicity, 1985..... 64

47. Length of Stay by Region and District, 1985..... 65

48. Length of Stay by Adjudication and Legal Status, 1985..... 66

49. Length of Stay by Type of Offense and Charge Type, 1985..... 67

List of Figures

1. Age Composition of DFY Admissions, 1985..... 5

2. Intake Month of DFY Admissions by Referral Region, 1985..... 21

3. DFY Admissions Placed in Same Region by Region of Referral, 1985..... 27

4. DFY Admissions Placed in Same Region by Region of Referral and Adjudication Status, 1985..... 28

5. Intake Month of DFY Admissions by Level of Placement, 1985... 33

6. Charge Type by Sex, 1985..... 44

7. Top Five Offenses of DFY Admissions for Males and Females, 1985..... 45

8. Crime Type and Seriousness of Offense by Age, 1985..... 49

9. Intake Month of DFY Admissions by Adjudication, 1985..... 51

## PREFACE

The New York State Division for Youth has two basic responsibilities. It provides state aid to localities for the operation of Youth Development and Special Delinquency Prevention, Detention and Voluntary Agency programs, and it directly offers residential and non-residential services for youth referred to it by the courts, Social Services and other agencies. The information contained within this volume is concerned exclusively with the description of the social, legal, and demographic characteristics of youth admitted to the Division's residential programs during calendar year 1985.

To maximize comparability across years, the format of the 1986 report follows very closely that of 1985. Although it is hoped that the report will undergo continual refinement, continuity in the presentation of yearly admission information has been identified as an important Annual Statistical Report objective.

### Structure of the Report

In order to provide a comprehensive overview of the characteristics of the client population served within the Division's residential programs during the 1985 calendar year, the following strategy of presentation is employed:

A. Admissions

— The "Summary and Highlights" overview (Part A, pages iv-v) identifies particularly noteworthy characteristics of youth admitted during the 1985 calendar year.

— Section I (Table 1) describes major changes in the composition of the Division client population between calendar years 1984 and 1985.

— Section II (Tables 2-8) presents information for comparative purposes on the characteristics of three distinct types of admissions to Division residential programs in calendar year 1985: (a) youth admitted to a Division residential program for the first time; (b) youth readmitted to a residential program from aftercare while still on their initial placement with the Division; and (c) youth whose prior legal placement may have expired, but whose conduct has resulted in their subsequent placement with the Division on a new placement order.

— Section III (Tables 9-20) presents information on the characteristics of all admissions to DFY residential programs according to their region and district of referral. These tables provide a basis for examining the differences in youth populations referred from different regions and districts. The final table in this particular section (Table 20) also permits an examination of Division policy regarding placement of youth as close to their home communities as possible.

-- Section IV (Tables 21-28) presents in more detail the social and demographic characteristics of all DFY admissions according to their level of placement. Since the Division's residential programs are structured according to level of security and community basedness, these tables provide a source of base line information regarding the extent to which youth populations differ among secure, non-community based, and community based programs.

-- Section V (Tables 29-39) explores more intensively the social and demographic characteristics of all DFY admissions.

-- Section VI (Tables 40-45) presents similar social and demographic information on all DFY admissions by responsible county. These tables should prove of greatest interest to local social service districts, county level youth bureaus, and county youth service administrators and agency personnel.

Before proceeding to an examination of the tables, a few notes are in order. First, admissions from aftercare immediately preceded by a discharge of six days or less are not counted as a distinct admission.

Secondly, Section IV presents information pertaining to youth's Level of Placement. The tables in this section refer to Levels numerically (i.e., I through VIII). These Level numbers are to be interpreted as follows: Level I, secure; Level II, limited secure; Level III, special residential; Level IV, rural, non-secure, limited access; Level V, community based limited access; Level VI, community based open programs; Level VII, foster care/independent living; and Level VIII, cooperative, voluntary and alternatve agencies.

Thirdly, the percentages which appear in subsequent tables refer to the proportions based on known responses. Hence, they are computed on the total number of cases (for a given table) less the number of unknown values for each variable. To enhance readability, the row percentage totals (100.0%) have been eliminated in most tables.

Every effort has been made to minimize the amount of missing data for each variable included in the report. A comparison of the current levels of unknown information with those of 1982 illustrates the extent to which that goal has been achieved. As a result of this effort, however, there are two distinct sources of variation in measures of yearly change. The first is the actual change experienced between time periods. The second results from a reduction in the effects of systematic bias in the reporting of information. Although this does not render yearly comparisons meaningless, the latter influence should be considered in interpreting levels of change.

B. Service Terminations

-- The "Summary and Highlights" section (Part B, pages vi-vii) identifies information on client length of stay for youth whose stays with the Division terminated during calendar year 1985.

-- Section VII (Tables 46-49) provides a comprehensive description of the total residential length of stay for youth served by the

Division. The present report summarizes this LOS information for stays terminating in 1985 either through release to aftercare or discharge directly from facility. Two main types of information are presented; (1) average LOS for clients with various background and legal characteristics, and (2) numbers and percentages of service terminations falling within a range of seven six-month intervals.

It is important to note that LOS as reported here is not facility or level specific, but is defined as the total residential length of stay. This means that the length of time that a client remains in each facility during a particular term of placement is essentially added together to produce an overall LOS.

It is also important to note that the counts that appear in the tables refer to service terminations and not to individuals. Thus, a client whose service was terminated twice in 1985 would be assigned two length of stay figures.

## SUMMARY AND HIGHLIGHTS

A. Admissions

1. A total of 2,424 youth were admitted to DFY in 1985; 2,008 (82.8%) new admissions, 286 (11.8%) readmissions from aftercare and 130 (5.4%) new admissions with prior service (see Table 1).

2. The 1985 admission rate revealed an increase in the number of youth admitted to the Division. Admissions for 1985 exceeded those for 1984 by 168 youth, an increase of 7.4% from 1984. This is a significant change from the 5.8% decrease experienced between 1983 and 1984.

3. The age distribution for youth admitted during 1985 remained virtually constant in comparison with youth admitted during the preceding year; the mean age for youth at admission during 1985 was 15.6 years, and for 1984, 15.5 years.

4. The increase in readmissions from aftercare reported in 1984 leveled off during 1985. Admissions to DFY from aftercare comprised 11.8% of all DFY admissions. Admissions with prior service also remained constant at 1984 levels, constituting 5.4% of all DFY admissions.

5. Youth adjudicated as Juvenile Offender, Restrictive Juvenile Delinquent or Juvenile Delinquent comprised 78.3% of all 1985 admissions, a decrease of 2.1% from 1984. Looking solely at Juvenile Delinquents, however, there was a 6.1% increase in this type of admission from 1984 to 1985. Compared to 1984, the number of youth admitted for Class A felonies increased 21.1%, while those admitted for Class B felonies decreased 18.4%, and those admitted for Class C felonies increased 2.5%.

6. Of the 2,008 youth newly admitted to the Division, Blacks accounted for 46.4%, Whites 37.7% and Hispanics 15.5%. The pattern of Blacks constituting the majority of readmissions from aftercare continued in 1985; Blacks constituted the majority of readmissions from aftercare in 1985 (48.0%), followed by Whites (32.9%) (see Table 2).

7. The decrease in admissions to secure facilities leveled off during 1985; in 1984 admissions to secure facilities accounted for 13.2% of the total admissions to DFY residential care, in 1985, 12.2% (see Table 1).

8. Among all DFY admissions, 42.0% were placed in Region III. Again, this can be attributed to the number of Division beds located in Region III, which accounts for more than 40% of all Division beds statewide.

9. A comparison of admissions by region of referral shows an increase in Regions I, III, and IV, while Region II decreased. Region III showed the largest increase in placements (19.1%), followed by

Region IV (7.4%) and Region I (6.4%), while Region II admissions decreased (3.1%).

10. The marked difference in Region IV and non-Region IV youth admitted to secure programs continued in 1985. The proportion of Region IV youth placed in Level I was 19%, while youth admitted to secure programs in 1985 from the remaining three regions accounted for only 3.2% of their total admissions. Region IV accounted for 87.5% of all admissions to secure facilities during 1985 (see Table 15).

11. The proportion of all youth placed in the region of referral rose from 48% in 1984 to 53% in 1985, a reversal of the trend of slowly but steadily declining "same region" placements first noted during 1980 (see Table 20).

12. Placement in the same region as referral is largely dependent on the types of programs and facilities available in each region. Overall, Juvenile Offenders were placed in the region of referral 26.1% of the time. Restrictive JDs were similarly placed in 25.0% of the cases, while 48.5% of the JDs were placed in the region of referral.

13. There was a pronounced association between region of referral and offense. Region IV, while accounting for 56% of all admissions, accounted for 82% of homicides (n=39), 100% of controlled substance offenses (n=38), 91% of robberies (n=354), 78% of dangerous weapons charges, (n=46) and 75% of all kidnapping charges (n=4) (see Table 18).

14. The strong association of ethnicity and region of referral continued for 1985. While only 21% of White admissions were referred from Region IV, 72% of Blacks and 91% of Hispanics were referred from these same counties (see Table 11).

15. The relationship between ethnicity and level of placement reported in past years continued in 1985. In the Division's secure programs, for example, approximately 67% were Black, 23% were Hispanic and 10% were White. Among those admitted to community based facilities, 50% were White, 40% were Black and 9% Hispanic (see Table 21).

16. An examination of ethnic differences in the type of charge (an important determinant of initial placement) revealed that 16% of White (JO, RJD or JD) admissions involved the commission of a Class A, B or C felony. The comparison figure for Black youth was 31% and 31% for Hispanics (see Table 35).

17. The tendency to find differential distributions of offense among ethnic groups is consistent with preceding years. Whites, while comprising 29% of all JOs, Restrictive JDs and JDs, accounted for 47% of arson charges, 49% of criminal mischief charges, 42% of burglary charges and 35% of other theft charges. Blacks (51%) were charged with 63% of all controlled substance charges and 71% of all robberies. Hispanics, while accounting for 19% of all JOs, RJDs and JDs, were disproportionately represented in charges of homicide

(31%), possession of firearms/dangerous weapons (35%) and controlled substance charges (32%).

18. Among the 1,898 newly admitted Juvenile Offenders, Restrictive Juvenile Delinquents and Juvenile Delinquents, the top five offenses were: larceny (22%), robbery (19%), burglary (17%), other theft (12%), and assault (10%) (see Table 8).

19. Females (representing 9% of the JO, RJD and JD admissions), accounted for 24% of admissions involving an assault charge, 18% of the arson charges and roughly 13% of larceny charges (see Table 32).

B. Service Terminations

1. Average length of stay (LOS) for youth whose stays were terminated in 1985 was 13.8 months, with 77% staying 18 months or less. These figures are based on a total of 2,305 service terminations.

2. An examination of admission type (Table 46) shows the majority of youth to be new admissions with an average LOS of 14.7 months. Admissions with prior service and readmissions from aftercare had average stays of 13.2 and 9.8 months, respectively.

3. Table 46 also shows a general trend toward shorter average lengths of stay for older youth. The youngest group, the 10 to 12 year olds, had the longest average LOS of 20.0 months. LOS gradually decreases to 5.7 months for the 18 and over age group.

4. On average, males had longer lengths of stay than females (14.0 and 12.6 months, respectively). However, these figures reflect a greater representation of males than females in more serious (JO and RJD) adjudication categories (see Table 31).

5. Breakdowns of LOS by ethnicity show variations in LOS for Whites (12.9 months), Blacks (14.4 months), and Hispanics (14.0 months). However, these differences in LOS appear to be a function of ethnic group differences in type of charge, and should be interpreted together with offense data (see Table 35).

6. Regional differences in average LOS (Table 47) also were observed. Youth placed from Region III had the shortest average LOS at 11.8 months. Youth placed from Regions I and III had approximately equal average lengths of stay at 12.2 and 12.1 months, respectively. Youth from Region IV had the longest average LOS at 14.8 months, as would be expected on the basis of its large numbers of serious offenders.

7. Length of stay varied with adjudication from a high of 27.9 months for Restrictive Juvenile Delinquents to a low of 1.3 months for youth in the "Other Adjudication" category. Juvenile Offenders stayed an average of 16.9 months, Juvenile Delinquents, 13.6 months, and PINS, 12.8 months. While the length of stay for JOs appears to be unexpectedly short, this may be accounted for by several factors.

First, since these figures are based on stays rather than individuals, very short lengths of stay may represent second stays for an individual (for example, in cases of parole violators). Secondly, due to the recent nature of JO legislation, the increasing number of JO placements and the relatively long sentences typically awarded, youth with comparatively brief lengths of stay tend to be overrepresented in a service termination group. Due to these factors, the LOS identified here does not represent the length of time JOs admitted during a given time period will remain in program. A better estimate of JO LOS was found to be 25 months (see Population Growth in DFY Level I Programs, September 16, 1982).

8. Differences in average LOS with legal status of placement are shown in Table 48. The majority of placements fell in the category "Court to DFY," which had an average LOS of 14.1 months; representing the longest average LOS for youth whose service was terminated during 1985 were placements in the "Court to DFY to Voluntary Agency." Relatively short average lengths of stays occurred for youth in the categories "Condition of Probation" (9.0 months), and 358-A voluntary placements (8.5 months).

9. Table 49 shows longer average stays to be associated with more serious crimes. For example, the average LOS for homicide was 29.2 months, as compared with an overall average stay of 14.3 months for the 1,852 JOs, RJDs and JDs terminating service in 1985. The majority of offenses fell in the categories of assault, burglary, larceny, robbery and other theft. LOS associated with these categories ranged from 14.5 months for the charges of robbery and assault, to 13.4 months for larceny. Shortest average stays (10.4 months) were noted in the category "kidnapping."

10. More serious charge types, like offense types, were associated with somewhat longer average stays. For example, average LOS for felonies was 15.1 months, while average LOS for misdemeanors was 13.4 months. Class A felonies showed a markedly longer average LOS of 31.7 months. As would be expected, the less serious category "Violations," had a shorter average LOS (10.2 months).
